

Customized Web-Based IEP Software

The Solution to Special Education Paperwork

Reduce Paperwork and Improve Student Services,
More Accurately Write, Edit and Review IEPs.

Friendly Features Handle Everything

Your IEP users will perform all paper-based IEP tasks with Emerge. What's more, you'll be able to reduce your administrative overhead and spend more time with your team.

Special needs students depend on you. That is why we created Emerge. Our package will help you improve their educational outcomes by reducing paperwork and raising IEP quality. With this simple yet powerful software, your team will save time.

Emerge streamlines documentation and gives your team *universal, reliable access* through any Web browser on your network. This friendly and intuitive IEP creation and archive tool helps you meet each student's unique needs while ***maintaining full confidentiality***. Emerge is extremely secure, reliable, scalable, and robust, and duplicates your current forms *on screen*.

Emerge Will Liberate Your Team

Working with special education and IT school district staff, Healex designed and tested Emerge to provide substantial benefits. After adopting Emerge, you will see a dramatic improvement in IEP logistics and system administration:

- Quickly create, save and review IEP records in a single place.
- Enjoy a custom IEP solution that lets you view and print IEP forms identical to your current forms.
- Use automatic color codes and forms logic to guide users through steps and improve IEP quality.
- Review personal caseload.
- Save users very significant time in data entry, retrieval, and information gathering.
- Establish goals and benchmarks online or use personal and district libraries.
- More easily track student performance goals and progress.
- Record comments and student progress.
- Improve information gathering and reporting for better compliance with state and federal agencies.
- Use quick student searches for ID (state or district), Service Area, Grade, IEP Type, School, Name, etc.
- View years of student IEP history.
- Eliminate IT hassles and costly infrastructure upgrades.

Customized Web-Based IEP Software

Using EmERGE Is Easy

EmERGE is quick, friendly, confidential, and powerful. Simply use a district computer on your Intranet with a Web browser. Go to your internal district IEP Web page and login with your user name and password. Since EmERGE is *designed for end-users*, you'll quickly become comfortable and productive.

Powerful Administrative Tools

- Store and retrieve caseload and other services information.
- Run complex searches and reports.
- Link to your existing student databases to reduce data entry and provide consistency.
- Update student information, including demographics, school changes, grade changes, and status.
- Manage IEP system users and assign schools, caseloads, and rights.
- Track student progress and monitor IEP compliance and quality.
- Set annual and periodic progress dates for schools and years.
- Offer online assessment instruments and results reporting.

Getting Started

If you see the potential benefit of an EmERGE installation or have any questions, please contact us. We have solid experience with school districts and can quickly help you gauge whether EmERGE is the right choice for you and your team. We will discuss your needs and give you a *full online demonstration*. Please contact us today.

Healex Systems

Founded in 1992, Healex is dedicated to bringing efficiency and cost savings to our clients. We have worked closely with educators in the development of their special education software suites and continue to use their input to improve the product.
